Local & General

J. D. Henderson was a Calgary visitor Tuesday.

Mr. and Mrs. W. Sanders and son of Illinois are the guests of Mr. and Mrs. C. Davis.

Miss Clara Smith of Vancouver is a visitor at the home of her sister, Mrs. J. M. Moffatt.

Miss Edna Hollister left for Calgary to spend the rest of the holidays.

Mrs. Ed Larkins spent a few days this week visiting in Barons.

Miss Eva Bouzayan of Stavely is a guest at the home of her sister, Mrs. E. Latiff.

Mr. and Mrs. Pharis and Miss Kate Pharis visited at Trout Creek last week.

Mr. and Mrs. Arnold Becker and infant son returned to Champion this week.

Mrs. W. Diemert and Betty Lou, who have been Calgary visitors, returned to Champion this week.

Misses Violet, Elsie and Alice Taylor spent a few days last week as guests of their aunt Mrs. Tippet in Calgary.

Miss Blanche Schooley accompanied her father to Lethbridge and will visit there for a few days.

Mrs. J. Anderson was a tea hostess Wednesday, when she entertained in honor of her mother, Mrs. C. Williamson.

Mr. and Mrs. Geo. Harper and family of High River are visiting relatives in the district for a few days.

Mr. J. Graham of the Canadian Bank of Commerce staff, Vulcan is relieving in the bank at Champion.

Mr. Ted Boulter has left on his holidays and will spend two weeks at the coast.

Mr. John Carn of the Alberta Assessment Department of Edmonton paid an official visit to the municipal office Tuesday.

Mrs. Alex Goetz was a dinner hostess recently when her guests included Miss Ella Stephenson, Calgary, and Miss Florence Woodhull.

Miss Ella Stephenson returned to Calgary Saturday after spending a few days at her home here.

Miss C. Barrett is making rapid progress toward recovery.

Mr. and Mrs. G. A. Orr are home after a holiday trip to Spokane and other points south.

Billy Ditto of Calgary is visiting at the home of Mr. and Mrs. A. Bach.

Miss Margaret McLeod is a guest at the home of Mr. and Mrs. Grant McLeod at Hobson.

J. O. Reid of Aldridge is a business visitor in town.

Mr. and Mrs. J. McIntyre were Blairmore visitors over the week end.

Miss Marion Gardiner was fortunate in securing a position in a rural school near Bow Island. She will leave for that point in the near future.

Mrs. Fred Clover was a tea hostess on Friday, August 12th, when she entertained in honor of Mrs. H. N. Heal. Her guests included Mrs. A. W. Jopling, Mrs. J. McIntyre, Mrs. G. Depe and Mrs. Chamberlain.

Dr. C. T. Galbreath will conduct the regular Sunday service at the Alton Community Hall on August 21st, at 4:00 p.m. Subject "The Harmony of the Scriptures." Everybody welcome.

Obituary

The death occurred in the Galt Hospital, Lethbridge, on Wednesday August 10, of Teasdale Sisson, a resident in the Champion vicinity since 1908. Deceased was taken ill very suddenly and for a time it was hoped he would recover but the end came quite suddenly.

Deceased was born in Lindsay, Ontario in 1883 and was 70 years of age at the time of his death. He was married to Miss Mary Porter in 1908 and moved to Champion in 1908, residing in this district since that time. He leaves to mourn his loss, his wife, three sons, Frank, Milford and Erma all of Champion and one daughter, Mrs. Teskey of Carmangay. He was widely known in this vicinity and many friends will extend sympathy to the bereaved relatives. The funeral was held Friday with D. D. Farmer in charge.

Card of Thanks

Mrs. Teasdale Sisson and family wish to express their gratitude and appreciation for the many kindnesses extended to them during the brief illness of the late Teasdale Sisson, particularly to Mr. J. M. Moffatt, Mr. D. D. Farmer and Mr. Roy Luchia.

Baby Clinic to be Held Next Wednesday

A baby clinic under the auspices of the Champion W. I. will be held at the home of Mrs. F. C. Alcock on Wednesday, August 24th, between the hours of 1 p.m. and 4 p.m. Mothers in the community are cordially invited to come early and bring their babies and children up to six years of age for free health examination and advice. Miss E. M. Davidson R. N. of the Dept. of Public Health will be in charge.

Carload of New Wheat Shipped Wednesday

A carload of No. 1 hard wheat was shipped by the Searle Grain Co. on Wednesday, August 16. The wheat was grown by Frank Racher and was a fine sample of grain. The field in which it was combined yielded approximately 24 bushels to the acre.

The Hungarian partridge shooting will be open from October 1st to November 30th, with an increased bag limit of 15 birds a day and 200 a season. The open season for ducks and geese will be from 12 o'clock midday September 1st, to November 14th.

Mr. Delbert Fleming of Coleman was a visitor at the home of Mr. and Mrs. W. Ulrich last week. Mr. Fleming is a son of Guy Fleming, who was an early settler, coming to this district in 1908 and leaving in 1918.

The final payment on wheat placed in the 1931-32 pool was made on Tuesday. The final payment on No. 1 Northern was 114.2 cents while the total amount of the payment was approximately \$200,000. The net sales price on No. 1 hard was 57.730 cents.

NOTES AND COMMENT.

The Imperial Economic Conference's subcommittee completes a big task in industrial standardization. Machinery and manufacturing specifications of the various Dominions are considered and coordinated. C. LeMaistre, Director of the British Standards Institution, a technical adviser, shows that immense benefits will flow to the countries adopting these identical rules governing goods for export. Saving of waste in materials carried will help both producer and user. Simplification in some lines has been almost unbelievable—one national specification being made to answer where 100 formerly standardized the trade.

The world's eyes turn upward to the stratosphere. In attempting to surpass his previous climb to 50,000 feet seled in an aluminum ball beneath a balloon, Prof. Auguste Piccard is leading a wide attack on mysteries of the upper regions. Germany and France are experimenting with airplanes having rounded metal cabins to withstand rarefied atmosphere and an average temperature of 70 degrees below zero. These will try to establish a bright theory that would revolutionize air travel—that in the rare air of 10 miles up limitations loosen and planes can go 500 miles an hour.

Canada hears Premier R. B. Bennett put a delegation of combustible Communists in their place. They demand the right to hold unlawful meetings, pardoning of Communists in prison, lifting of the embargo against Soviet Russia. The Premier responds: "We are doing this for you can for Canada. Help and we will appreciate it; criticism and we will have no enemy; but defy the law and the Government will smother your defiance. Our laws are the considered will of the people. Break them and, as inevitably as the sun shines, you will pay the price." Mr. Bennett's words titillate a worried world—Premiers can be priceless.

St. Catharines, Ont., see aviating dog trust himself completely to aviating man. Hal Brooker, wearing a parachute, steps from the wing of a plane at 180 feet and calls to his dog Cal, also properly parachuted, to follow him into space. Without any hesitation, confiding Cal rains down after his master. Unhurt, they land in a field. Cal emitting a triumphant bark. Long, long ago the man and the dog made one and stand or fall together—and the silly old canine just never has forgotten.

An American auto manufacturer increases his orders for steel. He plans a busy car to fit the needs of South Africa, with which he has had no communication. But South Africa at the Ottawa conference proposed to order cars from Canada in exchange for orders for its fruits and maize, and the American manufacturer sees his Canadian branch plant sharing in the benefits. Any big manufacturer who wants to be an isolationist—can keep his goods to himself. But the large scale supplier finds but one sure way to step along with the world-wide demand.

Advertising, an expert points out, is an indispensable tool of our economic comeback. But the advertisements themselves must be couched, but to no that will permit no comeback.

The labor saving device most needed now is one to prevent workers from losing time in hunting jobs.

Perhaps the recent rise in the price of butter will give the farmer an opportunity to butter his own bread, also.

No Attempt to Collect Over-payment

Definite denial was made by Premier Brownlee in a statement recently made at Edmonton, of rumored plans of the Wheat Pool to collect from this year's crop certain losses sustained in previous years. Premier Brownlee's comment to The Edmonton Journal was as follows: "I have been surprised to hear that rumors are again being circulated throughout the province with respect to the Wheat Pool, to the effect that they will be made to make up the losses in connection with the 1929 crop by deductions from any crop delivered to the Pool this coming crop season."

"I wish to again state, as I did last year, that there is no truth whatever to the suggestion. The agreement between the government and the Wheat Pool, as ratified by the legislature, provides for certain fixed payments for a period of twenty years. No attempt whatever will be made to collect any sum from the various growers as individuals, but we firmly expect the Pool will be able to make payments out of its total earnings."

A Separate Grade For Garnet Wheat Is Sought By British Milling Interests

Continuation of the policy of permitting Garnet wheat to be mixed with Marquis and Hereward varieties, or of marketing it as No. 1 and No. 2 Northern wheat will react sharply against all wheat sales from Canada, in the opinion expressed by William Smith, chief grain buyer and manager of the Scottish Co-Operative Wholesale Society.

The British miller, he stated, had found the Garnet variety unsuitable for milling purposes in Britain. At a recent meeting of the milling and grain interests held in London a decision was taken which called for the special grading of Garnet wheat as distinct from the other Canadian wheat varieties.

"It is to the interest of the Canadian wheat producers to see that this separate grading is undertaken," stated Mr. Smith. "The British buyer of wheat is determined that when he purchases grain on the Canadian market that the commodity supplied him will be either No. 1 or No. 2 Marquis or Hereward. Any purchase of Garnet variety must only be made for the strictly domestic market. It is in this variety, and at a price considerably below that paid for other standard Canadian varieties."

Reasons given by Mr. Smith for the objection of British and Scottish millers to Garnet were that it is lacking in protein values and that its baking qualities lack strength and stability as compared with the Marquis and Hereward varieties.

Mr. Smith was definite in his statement that he did not wish to be construed as advocating the non-growing of Garnet. "This may be the best type of wheat to grow in certain districts, but, for its successful marketing it must be labelled what it is and not be placed on the market as holding grade with the other Canadian varieties."

Unless there is a separate grade for Garnet, British millers and grain buyers will be forced to divert their purchases to other channels, and there is no assurance to them that the wheat bought will be the required Marquis or Hereward varieties.

A further factor, said Mr. Smith, which must be considered is that the continuance of a policy of not grading the Garnet wheat may result in definite lowering of the price of all Canadian wheat on the British markets.

Lets Electricity Do It

Farmer-Legislators Use Modern Method To Remove Stumps
When J. W. Barry, member of the Delta in the British Columbia legislature, wants to remove stumps from his big farm near Langley, he just turns a switch and lets electricity do the work.

Approaching the stump with an electrically-driven sapper, the stump expeller pierces each of the large roots to a depth of about six inches. Into the holes he pours a special oil, the heat of which causes the roots to burst and the sap to flow out. The oil mixture is touched off with a match and soon the entire middle part of the stump is incandescent as the heat is being eaten away by the flames. Air is forced under electrical pressure through the iron pipes so the fire is maintained under forced draught until the whole of the stump is destroyed.

New Natural Gas Producer

A large flow of natural gas has been struck in the Kinross field, southeast of Edmonton, Alberta. The new producer is reported to have a flow of 7,000,000 cubic feet per day.

A new bathing "suit" has been designed in which, after it has been used, the wearer can float for hours.

Professor: "Once again I have come out without my umbrella."—Mocha Warsaw.

W. N. U. 1905

Latest Scientific Winkles

Ink Spot Pictures Used To Analyze Human Brain

Ink spots are the latest scientific winkle by which psychiatrists can examine the human brain and determine whether individuals are normal or abnormal.

Hundreds of tests made by Mrs. David Ralph Hertz, wife of Tractor Commissioner Hertz of Cleveland, have established positively that reactions of individuals to ordinary ink spots can be used by psychiatrists to analyze them.

There is nothing mysterious about the spots, even though their use seems to lean toward black magic. Every school child has dropped a dab of ink on a piece of paper, folded it and then guessed what it looked like.

And that procedure is exactly the one Mrs. Hertz follows. She is working in conjunction with Samuel Beck of Boston. Beck is making charts of the reactions of abnormal people and Mrs. Hertz checks of normal humans.

"Of course, the test is only begun," she said. "Hundreds of more examples will have to be taken. But this test of mine has proved the process is practical."

Mrs. Hertz first tested 300 children in a junior high school. Using 10 ink spots, she showed each subject to look at each spot for two minutes, jotting down verbatim everything said.

Then she compared the answers with hundreds of others she got from special groups of psychoneurotics, maladjusted girls and feeble-minded.

By studying the normal for each special type, Mrs. Hertz can work backwards and quickly classify an unknown case.

Normal people seemed to see animal and insect life in the spots. Psychoneurotics were sensitive to color in some spots and most of them saw parts of the human body in the spots. The feeble-minded visioned far-fetched likenesses. With a normal unadjusted girls made their first remarks about the white spots left by the ink as it spread. That's called perseverence.

Well Known "Mrs. Grundy"

Famous Character Once Into Existence In English Play

That famous character "Mrs. Grundy," came into existence in a play called "Speed the Plough," written by Thomas Morton and produced some hundred and thirty years ago. In this play one of the characters has a habit of dragging his neighbour, Mrs. Grundy, into everything she says. At last her husband bursts out: "It is always 'What will Mrs. Grundy say?' What will Mrs. Grundy think?"

Actually, Mrs. Grundy never once appears on the stage! But the constant reference to her opinions appealed to the public fancy and she still survives as a stickler for the proprieties.

SPRING-CLEANING AN EMPRESS

The quantity of creamery butter produced in Canada in 1921 is the largest ever recorded by the dairying industry of Canada. It amounted to 225,000,000 pounds, an increase of about 40,000,000 pounds over the previous year. There are 2,699 dairy factories in operation in Canada.

Under special arrangement with the Dominion Government the Canadian Pacific Express Lines will, in future, have their annual summer overhaul in the great drydock at Victoria, British Columbia, instead of at Hong Kong, as in the past. Our picture shows the R.M.S. Empress of Russia in drydock, the smallest in the mammoth Victoria drydock which is 1,150 feet long with a minimum width of 124 feet. The drydock has a capacity of 42,000,000 gallons yet can be pumped dry in four hours.

The Victoria dock is excelled in size only by the Commonwealth Dock of Boston, which is 29 feet longer. The new Southampton dock is 1,200 feet long but over all is not as large as that at Victoria.

The Dominion Government, in order to bring the work to Canada's grandest special concessions which will result in the expenditure of some \$100,000 on labour plus the cost of material.

PROUD OF GAVEL.

Mr. Stewart Young, of the Town Planning Branch of the Saskatchewan Department of Municipal Affairs, recently displaying a gavel sent to him as Secretary of the Saskatchewan Land Surveyors Association by J. Lonsdale Doupe of Winnipeg. The gavel is made from oak grown on grounds of the pioneer home of the Inkster family at Kildonan, Manitoba.

Red Clover Seed

High Grade Seed Brings Three Cents Per Pound More Than Ordinary Article

According to a news report going the rounds of the press, farmers of the Huttville (Ontario) district, recently sold a shipment of 3,000 pounds of red clover seed which was graded and sealed as Certified, No. 1. This seed brought 3 cents per pound more than dealers were offering for ordinary No. 1, proving once more that it pays to grow the best. Watch the Huttville men when the World's Grain Exhibition and Conference takes place at Regina next year. At this great all-Canadian, open to the world show, there are four classes for clover seed with \$5,000 in 110 cash prizes. There are three firsts each of \$500.

Tests Were Successful

A successful secret test of a new torpedo-like rocket was conducted at Dummer Lake, near Oshawa, Ontario. The rocket, invented by the Haver engineering, Reinhold Tilting, is about eight feet long and equipped with wings about 10 feet wide. The rocket shot into the air and the wings unfolded at an altitude of more than 3,000 feet, permitting the rocket to glide to earth.

Creamery Butter Production

The quantity of creamery butter produced in Canada in 1921 is the largest ever recorded by the dairying industry of Canada. It amounted to 225,000,000 pounds, an increase of about 40,000,000 pounds over the previous year. There are 2,699 dairy factories in operation in Canada.

Additional Sites Recommended For Marking By Historic Sites and Monuments Board

Archaeologists May Be Making Great Discovery

Believe Manger So Long Venerated

Excavations started after an accidental discovery are expected to reveal the manger in which Christ was born.

A rock-hewn grotto at the Church of the Nativity at Bethlehem has been shown for centuries as the manger, but the new excavations seem to show that tradition has been mistaken.

Though it is agreed that the Church of the Nativity, the oldest Christian building in the world, stands on the site of the inn where Mary and Joseph sought shelter, not all authorities believe the manger now venerated to be the actual one.

The Church of the Nativity actually is a series of monasteries and churches of three sects—Greeks, Latins and Armenians—under one roof. Below the transept, reached by a circular staircase, is the Grotto, or Chapel of Nativity.

The pavement in the underground Chapel of Nativity was broken. After discussions between the three sects it was arranged that the public works department of the government should replace the flagstones.

When the workmen removed the old stones and started digging, they were surprised to find the remains of some former building.

The antiquities department in Jerusalem were called in, and walls, pillars, doors and stairs were revealed. Government archaeologists are now sifting shafts at three places.

It is thought by some experts that the remains found are part of the original church erected by Constantine the Great, the first Christian emperor, in the year 330. These parts, apparently, were covered by Justinian, who made alterations two centuries later.

A new pavement has been found and a subterranean vaulted roof.

Through this massive roof is being sunk a shaft into what may be the manger, the stable portion of the inn where Mary and Joseph sought shelter after they had been refused admission to the inn "because there was no room for them."

The archaeologists now working at Bethlehem are not prepared to make any statement until all the remains have been uncovered and exhaustively studied. Experts free to make a statement, however, believe them to be on the eve of the greatest discovery ever made by archaeology.

Keeping Up With Others

Is One Sense too Must Keep up with Others. Their success inspires us.

A student should not let another student outdo him! And the progressive idea of other people often lead us to better ways of doing business, and to better methods of living. Keep up with good sensible people!

But many prosperous people set a bad example. They spend too much money on fine houses, and expensive dresses and jewelry and automobiles. You may have enough to keep up with them, but I advise you to pay no attention to their example. Have simple habits. Live in your own way, according to your own taste, and well within your means. Remember, not all "high-dyers" are able to do a little "Up like a rocket, down like a stick!"

It is pitiful to see some poor people trying to keep up with foolish rich people! Everybody knows they are poor, and living beyond their means. They thus lose their credit and the respect of sensible people. Poverty is not a crime. No sensible rich man looks down on his poor neighbor—on the other hand, he has great respect for a sensible, industrious poor man!—J. P. Greene.

Likely Fills Her Column

The editor of the Times-Democrat, Flemingsburg, Kentucky, who by the way is a woman, apparently is acquainted with the failings of human nature. At the head of the "Personal" column each week appears the following notice:—"If you have visitors of whom you are not ashamed, report to this office."

An Ancient Salvage

A project is on foot to recover the treasure on board the "Orinot," one of the French ships that were sunk by Nelson in the Battle of the Nile on August 1, 1798. It is estimated that there is about \$500,000 worth of gold on board, part of the money seized by the French in Malta on their way to Egypt.

The development of interest in historic sites and landmarks throughout Canada has increased greatly during the past few years, mainly as a result of the excellent work being carried out by the Department of the Interior on the recommendation of the Historic Sites and Monuments Board of Canada. The Board, which was first constituted its annual meeting in Ottawa, was formed in 1919 with the sanction of the Minister of the Interior, to advise the department on the preservation of such monuments and sites as were considered of prominent national interest. The chief objects in view were the education of the nation in the history of the country, the stimulation of patriotic feeling, the commemoration of the deeds of those who bore a significant part in the exploration, defence and development of the country, and in addition the preservation as national property of sites having outstanding historic interest.

The first meeting was held in October, 1919, and the name "Historic Sites and Monuments Board of Canada" adopted. The Board is composed of eminent historians chosen with a view to having representation from all parts of the country. The Board is composed of the Minister of the Interior, Ontario, Up to date."

Among the sites recommended for marking at the recent meeting of the Board are those of the Fur Trade in Upper Canada, at Lyndhurst, Leeds County, Ontario; the first subterranean tunnel in North America, between Prince Edward Island and New Brunswick; and the fur-trading post of Norway House at the north end of Lake Winnipeg, in Manitoba. The inauguration of the first stage route between Quebec and Montreal, and the signing of the Indian peace made near Orillia, Ontario, are also to be commemorated.

The first iron furnace in Ontario was constructed at the Furnace Falls, township of Landow, County of Leeds, by Wallis Sudler in 1801, and was operated until 1812. The first submarine telegraph cable in North America was laid in November, 1858, between Cape Tormentine, New Brunswick, and Carleton Place, Prince Edward Island. Treaties made in 1783, 1818, 1819, and 1824, which transferred to public control the ancient country of the Huron living north and west of Lake Simcoe, will be commemorated with a suitable marker at Orillia, Ontario.

The release of Prince of Wales in the early history of Canada will be perpetuated with a marker reviewing the chain of events connected with the famous fur-trading post in Manitoba.

Believes Sun Spots Control Lake Level

Professor Finds Erie's Changes Follow Solar Cycle

Sun-spots control the level of Lake Erie, according to Prof. J. J. Nassau, observatory director of Cleveland, after a detailed study in co-operation with William Kook, graduate student.

Lagging two years behind, the water level in the lake rises and falls with the 11½ year cycle of minimum to maximum to minimum intensity in the spots on the sun. Dr. Nassau's experiments showed.

The unusually high level of the lake in 1930 was due directly to the fact that the sun spots reached a maximum and living beyond their means. Since 1930, the level has been receding annually and according to observations, will continue to do so at least two more years.

Mutual Trust Must Be Re-established

One of the most interesting and thought provoking articles I have seen my privilege to read for some time, and in these days of depression and pessimism it is as refreshing as a heavy shower on parched land, appeared in a recent issue of Toronto Saturday Night from the pen of Nicholas Ignatieff, a gifted young Russian engineer and thinker now resident in Canada. Mr. Ignatieff knows his native land and has written thoughtfully and sympathetically of it, but in the article to which we now refer he writes of "the British Empire as a new Canadian idea."

As he sees it the British Empire is not menaced so much by external enemies, by Bolsheviks or Communists, as by crass materialists within the Empire itself, who insist on exclusivity with material, economic values—those individuals who have abandoned the best traditions of the Anglo-Saxon race and have plunged into the abyss of crude money-worshiping, greedy, corrupt politics which care nothing for duty and public service. The real enemies of the Empire are those who cut themselves away from the vital sap of the historical, spiritual life of the mother country.

Mr. Ignatieff declares that it is not only his conviction, but the conviction of one of the foremost economists of the British Empire, Sir George Paish, that the way to general recovery does not lie so much in the field of economics as it does in the moral, spiritual sphere, which affects primarily our politics, and reflects adversely on economic life. In general, Mr. Paish holds that as long as politics are dominated by fear, suspicion, distrust and narrow self-interest, no economic remedy can solve the depression; and that as long as our mental attitude is changed and given place to a desire to co-operate, competition ceases to be another, the situation will just itself. In his book, "The Way to Recovery," Sir George declares: "By replacing fear with confidence, injustice with justice, and antagonism with co-operation, a new and better world may be created."

Continuing, Mr. Ignatieff says that when it is pointed out that one of the root causes of depression is the collapse of our present credit system, it is never realized by the crude materialist that here we are dealing practically exclusively with moral values. In the place, credit being the basis of the future, it is obviously non-material; it is primarily based on trust. The general breakdown of credit implies nothing more than the collapse of morals, the break-down of the moral basis of the credit system. It is no longer trustworthy because it does not honour obligations, because they are suspicious and fearful, selfish and greedy. Within nations, the same applies among individuals—there is general mistrust, suspicion, and they are largely for anti-social purposes by greedy, unscrupulous, immoral individuals. The solution of the paradox of scarcity in the midst of plenty is spiritual, not material. A little thought will convince one of the truth of these observations, yet they are dubbed "platitudes" by many worldly-wise people.

Until fear is dispelled, suspicion allayed, confidence restored, there can be no real and lasting economic recovery, because, until these better conditions prevail, credit cannot be re-established. Credit is founded upon these things; trust is the one permanent foundation upon which a credit structure can be erected, and until credit is restored the world will remain economically sick. So long as fear and suspicion rule men and nations, so long as narrow nationalism, because of such fear and suspicion remains the guiding policy of the nations, so long will trade obstructions be maintained, so long will there be an absence of credit. And just so long will the peoples of the world suffer economic hardship and loss. Therefore, what is repeated, what the world stands in need of today is a spiritual readjustment rather than economic reorganization. Given the first, the second will automatically and quickly follow. But without the one the other is impossible.

Lack Real Leadership

U.S. Public Opinion Not Yet Ready For Debt Readjustment

The New York Evening Post, agreeing that virtual cancellation of war debts must come, says that general United States "public opinion is not quite ready for the debt readjustment which her eastern seaboard now recognizes as inevitable." Public opinion "is not quite ready" because the United States public men and the press have persisted chiefly for political purposes, in pretending, though they must have known better, that the debts were collected. "They begin to deal with the question realistically, as is now the case, public opinion in the United States will accept the cancellation as not only inevitable but desirable. The people are all right if they are given competent leadership. But that leadership, since the war, in all the allied countries, have had the war—Winnipeg Free Press.

An Abundant Practice

One well known radio station has decided that in future the names of radio announcers will not be given, and it is said that others are likely to follow suit. The plan has always been about as sensible as it would be for a brakeman to give his Christian and surname after calling out the next station.

"Well, I've brought back the car you and me."

"How come?"

"When I bought it I thought '1932' was the license number, but now I realize it's the year of manufacture."

Don't leave kind words unsaid. Tomorrow may be too late.

Pains In Stomach and Bowels

So Bad Would Have To Sit Down

Mrs. C. Lantry, Moncton, N.B., writes:—"I can certainly recommend Dr. Fowler's Extract of Wild Strawberry for cramps or pains in the stomach and bowels. I have used it many times and it would have to sit down. I took Dr. Fowler's and it was a relief."

"When my children were small I always kept a bottle in the house and it helped them wonderfully whenever any of them had bowel complaints."

Dr. Fowler's Wild Strawberry

Poor Crop Prospects In Russia

Believe Country Will Need All Its Grain For Food

Poor crop prospects in Russia are indicated in the report by districts which the Dominion Bureau of Statistics received by cable from its London correspondent. "Grain exports," the summary declares, "are dependent upon the policy of the Soviet Government and the urgency of the need of foreign currency. The country needs all its grains for food, especially in view of the continued acute shortage of other foodstuffs."

Since it was the flood of Russian wheat on the market last autumn that broke the prices, the Russian crop prospects are of particular interest to Canada. Last year Russia exported, to July 31, 71,000,000 bushels, but the present report indicates that it will reach nothing like those proportions this year.

The summary states: "Vegetables are lacking for the winter months and at present vegetables constitute a large part of the diet as grain reserves, excepting surplus, are poorer crops than last year are indicated in the areas around export outlets."

Penion Act Investigation

Criticism Is Offered In Connection With Operation Of Plan

Disatisfaction with the personnel of the committee which will investigate the operation of the plan, and disappointment that the organization of which he is chairman is not represented on that committee was expressed at Ottawa by Mr. J. H. Young, president of the Canadian Association of the non-affiliated veterans. The representatives of the blinded soldiers and sailors and of the Canadian Legion are Mr. Young characterized as "privileged oligarchs." Their disabilities were obvious and consequently no dispute arose as to the manner in which pension payments were disbursed to them.

Other conditions, however, developed in connection with those ex-servicemen whose disabilities were not obvious, he declared, and these were not represented by the various associations which had been accorded membership on the committee.

"Most of those named in the committee personnel," said Mr. Young, "are connected with veterans' groups, the average of 100 per cent pension, and are men with obvious disabilities receiving the maximum."

He charged that the sympathy which such cases excite was the cause of their appointment. Mr. Young claims to represent over 100,000 ex-servicemen, from coast to coast.

In Times Of Peace

German Learning Protection Methods Against Gas Attack From Air

Classes have been established in Berlin to train women in the steps they must take for the protection of their household in the event of a gas attack from the air. Lectures are given on such subjects as how to make cellars gas proof. Branches of the "Women's Air Defence League" are being established in several centres throughout the country.

No More Asthma. Dr. J. D. Kellogg's Asthma Remedy stops the death knell of this trying trouble. It stops the choking, restores the breathing. It guards against night attacks, and gives rest and sleep and rest the whole night long. Much is claimed for this remedy, but it is not a cure. It is a relief. It is a relief by a trial. If you suffer from asthma, try it and convince yourself of its great value.

Larned A Lesson

A U.S. tourist made loud complaint in Aymer, Ontario, recently. It seems he had registered his goods in a station in another town, sending a \$10 U.S. bill in payment, and received his change in good Canadian money. On arrival at Aymer he discovered to his chagrin that the money was to change the Canadian money back into U.S. funds, and was most indignant when the bank demanded the count. He learned a lesson in exchange which has been taught many a Canadian visitor to the U.S.

Cheques Made Of Steel

Steel-jacketed bills were necessary to finance three expeditions to the Arctic, the cost of which amounts totalling \$125,000 which were received by the Canadian Trust Company. Given as prizes for the best discussions on the uses of steel, the cheques were made of one-eighth inch steel and all writing was done by arc welding.

FAT GIRLS OUT OF FASHION

Women of All Nations Slimming

All over the world Kruschel Salts is appealing to girls and women who are striving for an attractive figure.

Here is the method they are following: Every morning they take a half-teaspoonful of Kruschel Salts in a glass of warm water before breakfast.

They do this every morning—without missing one—for "It's the daily dose that takes off the fat." When Kruschel is taken daily, every particle of poisonous waste matter and harmful acids and gases are expelled from the system.

At the same time the stomach, liver, kidneys and bowels are cleaned up and the pure, fresh blood containing Nature's life-giving salts is carried to every organ, gland, nerve and fibre of the body, and this is followed by a feeling of renewed energy, health and activity that is reflected in their clear skin, cheerful vivacity, and a charming figure.

Improving On Nature

Hot Heated By Electricity Can Be Kept At Even Temperature

Hot heating by electric current has come to be recognized as an aid to the housewife to get their property in better shape. It is a great help in the market earlier and secure better prices. Equipment for heating beds, including cable and thermostats, was sent to farmers in the United States last year for the first time and several plans were set up in Canada.

But the power is used between sundown and sunrise, making it practically an off-peak load.

The advantage of electric heating with heat exchanger is seen in the more complete control. Flowers, such as Easter lilies can be speeded up and greater percentage of growth is noted in cuttings of plants. Celery appears to respond particularly well to the electrical current.

Recipes For This Week

(By Betty Barclay)

RIPE PLUM JAM—RIPE PRUNE JAM

4 cups (2 lbs.) crushed fruit.

1/2 cup sugar.

1/2 cup (2 lbs.) sugar.

1/4 bottle fruit pectin.

To prepare fruit, pit about 2 1/2 pounds fully ripe fruit. Do not peel. Cut into small pieces and crush thoroughly.

Measure fruit, solidly packed, and water into a large kettle. (For Ripe Plum Jam, add juice of 1 lemon.) Stir until mixture boils, cover, and simmer 15 minutes. Add sugar, mix well, and bring to a full rolling boil over hottest fire. Stir constantly between while boiling. Boil hard 1 minute. Remove from fire and stir in pectin. Skim, pour quickly. Paraffin hot jam, once. Makes about 11 glasses (6 fluid ounces each).

APPLE MOCK MACARON PUDDING

3 cups apple sauce, fresh or canned.

1 cup rice, finely crushed.

1/2 cup sugar, melted.

Put half the apple sauce in a buttered baking dish. Combine rice, crumbs, nuts, butter and almond extract. Pour the other half of the apple sauce over the prepared crumb mixture. Repeat layers. Bake 30 minutes in a moderately hot oven (375 degrees Fahrenheit). Serve hot or cold with cream or soft custard. Serves 6.

Infantile Paralysis

Belief Expressed That House Flies Carry Germs

Possibility that there is some significance in the fact that cases of infantile paralysis occur most frequently during the "house fly season" is suggested by Dr. W. J. Bell, Deputy Minister of Health for Ontario.

"It is pure theory," Dr. Bell said, "there is no scientific explanation for the fact that infantile paralysis occurs generally during the summer months, but the coincidence that more than 90 per cent of the cases are prevalent at that time may be significant."

Keep Douglas' Egyptian Liniment always in the stable, ready for immediate use. Removes poor flesh and inflammation. Thrush or Hoof Rot and infection of cow's feet.

Walks Across Canada

Setting out afoot from New Westminster, B.C., on April 14, Frank O. Potter, a former Nova Scotian who has lived the last 20 years in the United States, arrived at Halifax recently en route to his home in the Annapolis Valley. He had last visited his home in 1919. Mr. Potter walked most of the distance from the Pacific Coast, but received a motor lift at intervals.

The oldest cemetery in Canada is thought to be the one adjoining Old Fort Anne, Annapolis Royal, Nova Scotia.

In ancient Babylonia, medicines were frequently mixed in beer.

PERSONAL

SCOTTISH LADY AT PRESENT IN Canada, would like to take a change or more young ladies. Has experience in travel abroad, and with Canadian girls. Could act as company to lady in any part of Canada, or as travel companion. Has excellent testimonials both in Canada and in Britain. Write to the following address: Information to interested party—Apply Box 50, Winnipeg Newspaper Union, 115 McDermott Ave., East, Winnipeg, Man.

Northern Air Mail Service

Extends From Great Bear Lake To Lonely Arctic Poles

Extension of mail service by means of private flying facilities to meet needs of those in the Coronation Gulf and other parts of the Arctic, was announced by Major R. W. Hale, superintendent of the Edmonton postal district.

Instead of those living along the Arctic coast having to wait for indefinite periods, even two years at times, before receiving mail by boat from Akivik, they will now receive mail at much shorter intervals.

Arrangements have been made for the mail to be sent to Coronation Gulf, Victoria Island, and other non-post offices of a route that extends from Great Bear Lake, instead of the round-about way through Akivik.

When seaplanes leave Great Bear Lake for the 150-mile flight to Coronation Gulf, Victoria Island, and other distant points in that region, they will carry mail that has been routed to the mining region for northern delivery.

The points which will be served in this way include the following: Bay 60, Cameron Bay, Lindsay Bay, Glacier Bay, Echo Bay, Labine Point, Wainwright, Hare Bay, Douglas Bay, Coppermine, Fort Hearns, Dismal Lake, Borin Lake, Cambridge Bay, Bathurst, Red Island, King William Sound, Inuvik, Repulse, Wilmet Island, Walker Bay, Peterson Bay and Trepur River.

In likelihood, it will not be long before a post office is established at the mouth of the Coppermine River.

Changes in the Future

Scientists Predict Radical Weather Changes in the Future

Some time you hear people who lament the present condition of mankind. They express the wish that they might be living in this planet a few thousand years hence. They are sure there will then be more culture, more wisdom, more highly improved mechanics and a happier state of things all around.

But, according to the recent pronouncements of climatologists, there are great drawbacks to the enjoyment of an Edenic existence in those future days, and one of them will be a devastating flood. Dr. W. J. Humphreys, professor of meteorology of the United States Weather Bureau, says that with the vanishing of the last 6,000,000 square miles of ice sheets at and near the poles and in the high mountain the oceans will be raised 150 feet.

In this dismaying prediction Dr. Humphreys is supported by Professor David, of Australia; Professor Melardus, of Germany, and others, who also accept the theory of the American climatologists. They all agree that the last 6,000,000 square miles of ice sheets at and near the poles and in the high mountain the oceans will be raised 150 feet.

WORLD HAPPENINGS
BRIEFLY TOLD

The Rothendy dock, one of the largest on the Clyde, has been temporarily closed on account of decline of shipbuilding.

Divided on the common stock of Canadian Pacific Railway for the first six months of 1932 is not being paid at present.

The Church of Scotland plans to build 30 churches in Scotland in the next seven years, 10 of which will be in Edinburgh and five in Glasgow.

Representatives accompanying the Japanese Olympic team plan to buy the cabin of each athlete from that country who wins an Olympic title.

Newton, Mass., one of Boston's wealthiest suburbs, has nearly two automobiles for every family. There are 14,000 families and 25,000 automobiles.

Florence Ziegfeld, New York theatrical producer, who died recently in California, bequeathed his whole estate to Billie Burke, his widow, and Patricia, their daughter.

An air-taxi was chartered from Imperial Airways by a London woman for a return flight to Chelmsford, Essex, where she placed a wreath on a grave in the churchyard.

Art and agriculture are the only creative professions in the world, says John Erskine, novelist. "By artists I mean all craftsmen who are creators," he said, "and by agriculturists I mean all those who produce and create wealth from the soil."

San Francisco's new \$500,000 opera house, the first and only municipally owned opera house in the United States, will be formally dedicated next month as a war memorial. It will open Oct. 15, with performance of Puccini's "Tosca."

Indicative, it is said, of an improved lumber outlook, is the protest filed with the British Columbia government by mill men against the cutting of logs. Loggers, however, contend that they are in a position to satisfy all demands of the mill men as well as having care of any export trade being offered.

Britain's Unemployed

Seven and a Half Million People Depending On Government Aid

A wandering army of unemployed youths, vaguely reminiscent of the United States bonus army, is making its appearance in Great Britain as a result of increases in the number of jobs announced as 2,811,792.

Unemployment has made approximately one-fourth of Britain's 45,000,000 population dependent on government aid on government aid, for fully 7,600,000 men, women and children are existing wholly or partly on government or local relief in addition to the official total of jobsless.

As a result of the latest official figures, an increase of 64,438 in the month of July, and of 98,432 in the last year, the nation's relief machinery is scarcely able to cope with the situation.

Limit To Cattle Exports

Less Than 25,000 Head May Be Shipped To England Next Year

Less than 25,000 head of cattle would be shipped to the United Kingdom next year from Canada, even if the restriction now imposed against Canadian cattle landing in Britain were lifted. This estimate was made in an interview recently by Hon. Robert Weir, Canadian Minister of Agriculture.

Reports which have gone out that the lifting of the restrictions would result in Canada shipping from 100,000 to 400,000 head annually to Britain are regretted by Mr. Weir. These reports would tend to lift the British farmer with fear that his home market would be flooded by Canadian cattle, while no such danger really exists.

A material that does not stop the ultra-violet rays from the sun, resembling glass, and not as fragile, has been made from natural gas.

Barber: "Your hair is getting thin on top, sir. Have you tried our new hair tonic?"

Customer: "No, it isn't that."

Safe-breaker at home: "I should hate to open my own safe after other way."—Muskeete, Vienna.

Make Interesting Discovery

Canadian Scientists Gain Knowledge Of Universe Of Great Importance. New knowledge of the universe, stated to be of tremendous potential importance in the scientific world, has been gained by Prof. J. A. Ross and Dr. A. Vibert Douglas, McGill scientists who returned to the university following a month's research work conducted at the Dominion Astrophysical Observatory at Victoria.

Professor Foster declined to claim any success for their achievement until he and Dr. Douglas have had time to re-study their findings. He said, however, that the results of their work would quite likely create an upsurge of opinion among European scientists.

The two McGill scientists set themselves to examine the electrical fields of stars.

They conducted observations both at Victoria and at Pasadena, Cal. Only one day was spent at the latter place.

Victorian Order of Nurses

Miss Smellie To Visit Europe To Study Maternal Welfare Work

In recognition of the comprehensive programme of maternal welfare carried on by the Victorian Order of Nurses for Canada, the Dominion Astrophysical Foundation has extended to Miss Elizabeth Smellie, its chief superintendent, an invitation to visit a number of European countries within the next few months for the purpose of studying conditions of maternal welfare there.

Miss Smellie expects to sail early in September, visiting England, Denmark, Austria, Germany and Italy, and returning to Canada about the middle of December.

WORLD'S RECORD WHEAT MOVEMENT MARKS WELAND CANAL OPENING

Carrying 575,000 bushels of western wheat, representing the product of over 41,800 acres of prairie land and the largest single cargo ever carried in any single ship on any sea, the giant S.S. Lemoyne, of Canada Steamship Lines, 633 feet long and the biggest vessel on freshwater, opened the Welland Canal officially on August 6 at the presence of His Excellency, the Governor-General, Sir James Basil Macdonald, and the delegates to the Imperial Conference, Premier R. B. Bennett, members of the Cabinet and thousands of spectators.

The canal in a little over a week. Early in July this time the freighter "Ashcroft" went through the canal with 360,000 bushels of wheat on her way to Kingston only to see her record broken within a few days by the freighter "Glenesage" with 380,000 bushels. Both these vessels had formerly been confined to the Upper Lakes.

Less than a week after the "Glenesage" had set her new record for grain she returned to Lake Erie and brought down to Hamilton 12,910 tons of coal, another Welland Canal record which will likely stand for some time. On her latter trip the "Glenesage" also shattered all records for cargo carried into the port of Hamilton.

Today the "Glenesage" is the largest boat ever to have entered Lake Ontario, but compared to the "Lemoyne" she is a small freighter. Her length of 596 feet compared with the "Lemoyne's" 633 feet and her capacity is approximately 380,000 bushels compared with the "Lemoyne's" 571,000 bushels.

Consistent of special importance to the Empire since the Welland Canal in future will be the route used by most of Canada's grain ships. It was decided some time ago that the official opening should be on the programme of the Imperial Conference and efforts were immediately made to have the largest Canadian lake boat go through for this ceremony.

Elaborate preparations were made for welcoming the "Lemoyne" to Port Colborne on her first voyage and that in addition to delegates, government officials and representatives from other provinces large crowds of people viewed the ceremony.

The oldest known human skull belonged to a London woman, G. Elliot Smith, professor of anatomy at the University of London, stated at a meeting of the international congress of pre-historic and proto-historic sciences.

"The skull is known as the Lloyds' skull," he said, "and was found in blue clay 40 feet below the surface during excavations for the new home of Lloyds' corporation in Leadenhall Street. It belonged to a woman about 60 years old, who probably was left-handed."

After considering all the evidence and carefully studying all other known skulls of the kind, Professor Smith said, he decided the London skull represented the earliest genuine remains of homo sapiens, giving it pride of place over the Java man, the Peking man, and all other pre-historic finds.

The other attendees at the congress expressed great surprise over the announcement and left the hall immediately afterward to examine the skull and discuss the problem.

Do you keep your money in an outside or an inside pocket?" asks a male fashion writer. No.

"Sulphur" exclaimed a pretty young girl. "And how sulphur is there in a girl's body?"

"Oh, the amount varies," said the doctor smilingly, "according to the girl."

"Ah," remarked the girl. "That's why some of us make better matches than others."

Korea is the only country in the world where the marriage certificate is equally divided, one-half being given to the wife and the other to the husband.

Bookworms in the Irish Free State are demanding the removal of the new book tax.

The King of England has conferred the Royal Victorian Chain upon the Duke of Portland.

Naval Armaments

Difficult To Distinguish Between Defensive and Offensive Weapons

Why all this bother about "offensive" and "defensive" naval weapons? Because it is the submarine offense? Are battleships, mine-layers and bombing planes defensive?

There is one simple rule by which every case can be decided. The other fellow's weapon is extremely offensive, your own is purely defensive.

Ask any schoolboy or baseball fan. The humble pop bottle is the most innocuous of objects, quite inoffensive. Only prejudiced persons like the umpire could possibly construe it as offensive. Again take the peashooter.

Whoever heard of a schoolboy that used this mild little weapon for attack? As any boy knows, the uses of the peashooter, like the water-pistol, are solely for the warding off of attacks by others, especially those armed with peashooters.

And so it is with submarines and the like. The gentle U-boat regarded the Q-boat as highly offensive, whereas we all know it to have been purely protective. Putting the war in some of us harbored hard thoughts about submarines. Quite unjustly, it now seems, according to the French who are actually peering the war.

The underdog has become the Poor Nation's Armor. It is the cheapest naval weapon for frightening off offenders, against the use of which the uses of the peashooter, like the water-pistol, are solely for the warding off of attacks by others, especially those armed with peashooters.

The sad truth is quite evident. Weapons are defensive or offensive according to the uses to which they are actually put. When you have decided who is the offender, and who is on the defensive, then, perhaps, you may decide whose weapons are offensive. The submarine is a peashooter, and the U-boat is a water-pistol.

When his duties were over, he was constantly guarded by his assistant, a young man named Johnson.

When Moses had tarried on Mount Sinai, the people had complained to Aaron that, "as for this Moses, the man that brought us up out of the land of Egypt, we know not what he has become of him," and this new arrangement was better for the people, for they could follow him with their eyes till he entered the Tent. When they saw the pillar of cloud, the symbol of the Divine Presence, hover over the door of the Tent, each man, sitting and watching at the entrance of the Tent, would see up and worship. And Jehovah spoke with Moses, and he would see up and worship the emperor.

"Prayer is more than meditation, it is communion. It is a dialogue, not a monologue. It is not enough that man speak to God; he must believe that God can hear and, in some way, speak to him again. And one of the most sublime and surprising features of the Bible is that it is even more full of God's speech to man than man's to God."—John R. McPhee.

Within the "Tent of Meeting" Jehovah used to speak unto Moses face to face, as the man speaks with his friend. The expression, "speaking face to face," has become proverbial for intimate converse. It is an interesting and profitable exercise, as Dr. John R. McPhee reminds us, to watch the life-sized model gradually transform itself into its earlier limited conceptions of God. "Sometimes the highest and the lower views may be found within the same chapter. A profounder view than in even seven occurs in the farther chapters. We do not see My face; for man shall not see My face: I will smite severely the face of a man that seeth Me, and he shall die." It is a struggle with great emphasis, as it is in opposition to popular conception. "Ye only heard a voice; ye saw no manner of form."

"Prayer is the psychological fact by which the soul comes into conscious contact with God."—Robert F. Horner.

"We have too little praying face to face with God every day. Looking back at the end, I suspect there will be great grief for our sin of omission—omission to get from God what we might have had by prayer."—Andrew Bonar.

According To Supply The doctor was giving a lecture to a class of girls.

"Also," he remarked, "it has been found that the human body contains sulphur!"

"Sulphur!" exclaimed a pretty young girl. "And how sulphur is there in a girl's body?"

"Oh, the amount varies," said the doctor smilingly, "according to the girl."

"Ah," remarked the girl. "That's why some of us make better matches than others."

MONARCHIST REVOLT IN SPAIN IS SHORT-LIVED

Madrid, Spain.—Rioting mobs in Seville took their vengeance on monarchist sympathizers for the short-lived revolt against the Republic, which collapsed when its leader, General Jose Sanjurjo, fled the city and was captured while trying to get to the border.

While the rioters were burning buildings and bombing homes in Seville, the government proceeded with "mopping up" operations against the revolutionaries and the rest of Spain gave itself over to public celebrations in honor of the young republic's hardihood in its first great test.

General Sanjurjo, who complained that "everybody abandoned me and my undertaking," was on his way to Madrid from Huelva, where he was arrested after he had asked a military guard to show him the best way to Portugal.

President Niceto Alcalá Zamora presided over a lengthy cabinet session at which the punishment for the rebel general was discussed.

Nine buildings were destroyed in the Seville mobs. Among them were the offices of two newspapers—the A.R.C. and La Unión—and the church of San Isidro.

The rioters killed a civil guard near the Seville jail, which they attacked in an effort to liberate prisoners and to assault members of the civil guard held captive there because of participation in the revolt.

Shortly afterward, Premier Manuel Azana announced the general and all other officers and civilians connected with the revolution would be tried by the sixth section of the supreme court. This tribunal is devoted to military affairs.

The premier said he intended exterminating to the very roots the cause of the rebellion. "It would be unjust to those parties who were not involved in charges of sedition if the government allowed such crimes to continue," he said.

General Sanjurjo, who complained that "everybody abandoned me in my undertaking" after his revolt collapsed, was questioned lengthily at police headquarters here.

Wheat Carry-Over

Slight Decrease Is Shown Compared With Previous Year

Ottawa, Ont.—The carry-over of wheat at the end of the crop year, July 31, was 150,948,901 bushels, compared with 154,078,963 last year, the Dominion Bureau of Statistics reported recently.

Canadian wheat in elevators and afloat in the United States amounted to 4,706,828 bushels, while 1,181,427 bushels of Canadian wheat were afloat destined for United States ports. The comparable figures for these items at July 31, 1932, were 538,354 and 1,209,978 bushels, respectively.

The total amount of Canadian wheat in Canada and the United States at July 31, 1932, was 136,837,156 bushels compared with 140,577,275 bushels at July 31, 1931.

The final revision of the 1931 wheat crop estimates is not possible until January, 1933, when the final figures for deliveries and platform loadings are made available by the Board of Grain Commissioners.

Floods Take Heavy Toll

Hundred Thousand Chinese Homeless and Many Lives Lost

Harbin, Manchuria.—A hundred thousand Chinese residents of Harbin were forced by unprecedented floods to abandon their section of the city, which has become a vast inland sea. Approximately 3,000 persons were reported missing in the valley of the Shanghai River, which has risen far above the level in 1914, when Manchuria experienced the worst flood in its history.

Harbin's Chinese residents have congregated in cemeteries and fields on the outskirts of the city. Many of them are without food, clothing and shelter.

Cholera is spreading in the district and the people are hoarding food as prices sky-rocket.

May Finance Settlers

St. Catharines, Ont.—Possibility of 10 unemployed families of this city becoming pioneers of the Peace River district was seen in plans of the city council are completed. Under the proposal 10 families, financed with the maximum sum of \$600 each, provided by the municipal, provincial, and Dominion Governments, would be established in Peace River.

W. N. U. 1933

No Dairy Shipments

Lack Of Refrigeration Service May Prevent Exports Over Churchill

Route This Year

Montreal, Que.—Owing to the high rates that would have to be charged, little hope is held out that a refrigeration service will be available out of the port of Churchill, Man., to carry butter and cheese to Great Britain, at least this year, Thomas Harling and Co., steamship agents here, stated recently.

Efforts had been made by western Canadian interests to obtain steamship service from the west northern port for dairy produce, the company stated, but it was felt the rates would be too high to attract shippers. Vessels at present using the Hudson Bay route to carry grain do not have the refrigeration facilities necessary. Western Canada last year shipped a considerable quantity of butter to the United Kingdom when exports of that commodity were restricted after a slump of several years. Certain quantities of eggs and poultry are also shipped by rail to England, but the shipping being made via Montreal.

Winnipeg, Man.—Officials of the On-to-the-Bay Association had little comment to make on a Montreal dispatch, saying it would be practically impossible to ship dairy products from Churchill, Man., over a ship route, because of prohibitive rates. They regarded the statement as indicative of the difficulties encountered in developing the west route. Ample dairy produce was available in the west for export to ensure profitable operation of a re-railment in a special report after a slump in wheat, issued by the Dominion Bureau of Statistics, especially for the benefit of the shipping industry.

Conference.—Russia's total exports of wheat to the United Kingdom in 1931 amounted to 54,010,298 bushels, compared with 54,010,298 bushels in the United Kingdom of 1930-1931.

The total wheat requirements in 1931, of the United Kingdom, after wheat importing country of the world, amounted to 223,000,000 bushels. This was supplied mainly as follows: Canada, 58,982,000 bushels; Australia, 43,397,000; British India, 89,910,000; other British countries, 73,656,000; Russia, 54,010,298; Argentina, 38,701,714; United States, 15,578,000; Germany, 4,283,000; France, 35,000,000; and other foreign countries, 9,878,000.

Russia's upsetting invasion of the Empire wheat market came in the last two years, the total to the United Kingdom for 1930 having been only 34,909,000 bushels, while the five-year average ending with that year was 57,894,000 bushels for Canada.

Estimated gross average for the first British exports of wheat for the five years ending with 1930 amounted to 330,166,000 bushels. Canada which held all wheat exporting countries had an average total of 257,883,000 bushels.

Estimated average world exports during the same period totalled 692,649,000 bushels. Argentina led among the foreign countries contributing to this total with an average of 149,780,600 bushels, with United States, Hungary, Austria, Germany, Rumania, Poland, and Russia following in order.

Russia's average was 31,985,300 bushels.

Alberta Delegates

Edmonton, Alberta.—Hon. George Hoadley, Minister of Agriculture, and Dean Haves of the university, will go to the Alberta delegates to the meeting called by Hon. Robert Weir, federal minister of agriculture, for August 29 in Toronto.

Hon. H. H. Stevens, Minister of Trade and Commerce for Canada, will be present. Speaking briefly, he called upon the Prime Minister, Rt. Hon. B. Bennett, to address the assembly.

After a short address from Mr. Bennett, his excellency, upon whom fell the duty of declaring the building open, spoke.

Quest For Blondes

Scientists Require Golden Hairs For Recording Humidity

Montreal, Que.—The McGill University westerners' quest for blondes whose tresses reach their waists brought quick response Wednesday. Telephone calls assured him there are still women in Montreal with hair uncoloured and who are willing to sacrifice a few hairs of it on the altar of science.

The McGill meteorologist requires such rare golden hair for a hygrometer, a delicate instrument used for recording humidity changes for hours to hours. The hair of brunettes is too coarse.

Should Attend Unveiling

St. Catharines, Ont.—Representation of the Dominion of Canada by a composite battalion of great war veterans at the unveiling of the Canadian memorial at Vimy Ridge, which may take place next year, was recommended by Col. Hercule Barre, Canadian trade commissioner to France.

Kaye Don Will Race Again

British's Speedboat Racer Has Hope Of Capturing Trophy

London, Eng.—Kaye Don, Britain's speedboat racing star and holder of a new world's record upon the water, left here for Southampton to sail on the steamer "Majesty" for Detroit, where he will race against Gar Wood for the Harmsworth trophy.

A large crowd of cheering admirers bade him farewell.

"I am making no promises," he said, "except this—I will do the best I can against Wood's boat, which has much more horse-power than my Miss England III."

By promising to do the best he can, Don must be would try to reach again on the new Detroit course, the two-miles-a-minute pace he set when he shattered his shonice power plant across Loch Lomond at an average speed of 119.81 miles an hour, with a top mark of 120.5 miles, the fastest any human has travelled over the water.

CANADA'S SHARE OF BRITAIN'S WHEAT IMPORTS

Ottawa, Ont.—During the calendar year 1931 Russia supplied the United Kingdom with 24.34 per cent. of total wheat requirements while Canada's percentage was slightly higher at 25.12. These figures were contained in a special report on world trade in wheat, issued by the Dominion Bureau of Statistics, especially for the benefit of the shipping industry.

Conference.—Russia's total exports of wheat to the United Kingdom in 1931 amounted to 54,010,298 bushels, compared with 54,010,298 bushels in the United Kingdom of 1930-1931.

The total wheat requirements in 1931, of the United Kingdom, after wheat importing country of the world, amounted to 223,000,000 bushels. This was supplied mainly as follows: Canada, 58,982,000 bushels; Australia, 43,397,000; British India, 89,910,000; other British countries, 73,656,000; Russia, 54,010,298; Argentina, 38,701,714; United States, 15,578,000; Germany, 4,283,000; France, 35,000,000; and other foreign countries, 9,878,000.

Russia's upsetting invasion of the Empire wheat market came in the last two years, the total to the United Kingdom for 1930 having been only 34,909,000 bushels, while the five-year average ending with that year was 57,894,000 bushels for Canada.

Montreal, Que.—The McGill University westerners' quest for blondes whose tresses reach their waists brought quick response Wednesday. Telephone calls assured him there are still women in Montreal with hair uncoloured and who are willing to sacrifice a few hairs of it on the altar of science.

The McGill meteorologist requires such rare golden hair for a hygrometer, a delicate instrument used for recording humidity changes for hours to hours. The hair of brunettes is too coarse.

Should Attend Unveiling

St. Catharines, Ont.—Representation of the Dominion of Canada by a composite battalion of great war veterans at the unveiling of the Canadian memorial at Vimy Ridge, which may take place next year, was recommended by Col. Hercule Barre, Canadian trade commissioner to France.

The grave of Field-Marshal Lord Plumer in Westminster Abbey, showing four cushions on which are placed his insignia. Lord Plumer's remains lie close to those of the "Unknown Warrior." The tablet shown at the left back-ground reads in part: "To the Glory of God and to the Memory of One Million Dead of the British Empire who Fell in the Great War of 1914-1918."

ADDRESSES SEED GROWERS

Prairie Provinces Have More Than Million More Acres Under Crop This Year Than Last

Ottawa, Ont.—The prairie provinces have 1,042,278 more acres under wheat this year than last, according to a report issued by the Dominion Bureau of Statistics Wednesday, August 10.

"For all Canada, the increase is 844,250 acres," the report states. "The estimates of the areas sown to the principal grain crops in the three prairie provinces as shown by the annual statistics collected in June last through the rural schools are now available. The figures reveal an increase of 1,042,278 acres (four per cent.) in wheat, and 221,033 acres (2.7 per cent.) in oats, with slight decreases in barley and rye and a rather drastic reduction of 28 per cent. in flaxseed acreage from 618,961 to 445,700 acres."

Under the auspices of the Canadian Seed Growers' Association, Field Days are being held this month at various points throughout Saskatchewan. Mr. H. S. Vigor, secretary of the Saskatchewan Branch of the Association (shown above), will be one of the principal speakers.

War Loan Conversion

British Plan Is Attempted With Success According To Report

London, Eng.—The success of Great Britain's war loan conversion is strikingly illustrated in the official report of government revenue and expenditure for last week, from which it is inferred that nearly 11,600,000,000 out of the total of 12,084,984,000 was converted by July 21.

The report includes an item of expenditure, "cash bonuses, £15,703,000 sterling." When the government announced its conversion scheme on June 30, where five per cent. securities could be exchanged for a 3½ per cent. issue, bondholders were offered a cash bonus of £1 for each £100 if they gave notice of intention to convert.

While no official announcement of the progress of the scheme was issued, London financial houses were quick to observe the cash bonus item, multiplying it by 100 to find the figure converted in July.

Wheat For Italy

Shipment Being Forwarded Direct Through Port Of Churchill

Winnipeg, Man.—A shipment of wheat that will go to Italy this summer direct from the port of Churchill, Thomas Harling, Sr. head of Thomas Harling and Son, shipping agents, made the announcement here just before he left for the northern port to superintend the loading of the first British exports of wheat for the season, the "Pennyworth" and "Silent."

Mr. Harling said the chartering of a vessel for the shipment to Italy indicated the Hudson Bay route was appealing to continental importers as well as to Great Britain. The vessel would carry the first cargo to go direct from Churchill to the continent.

The three vessels already chartered will carry about 150,000 bushels of wheat.

Enlarging Elevator

Winnipeg, Man.—The United Grain Growers, Limited, have awarded a \$250,000 contract to the Northern Construction Company, of Vancouver, for the extension of their elevator there to a capacity of 2,000,000 bushels, the work to be completed by November 1, according to an announcement of R. H. Law, president of the firm here. The present capacity of the elevator is 1,600,000.

WHERE A NOTED WARRIOR RESTS

H. Law, president of the firm here. The present capacity of the elevator is 1,600,000.

Increased Acreage

Prairie Provinces Have More Than Million More Acres Under Crop This Year Than Last

Ottawa, Ont.—The prairie provinces have 1,042,278 more acres under wheat this year than last, according to a report issued by the Dominion Bureau of Statistics Wednesday, August 10.

"For all Canada, the increase is 844,250 acres," the report states. "The estimates of the areas sown to the principal grain crops in the three prairie provinces as shown by the annual statistics collected in June last through the rural schools are now available. The figures reveal an increase of 1,042,278 acres (four per cent.) in wheat, and 221,033 acres (2.7 per cent.) in oats, with slight decreases in barley and rye and a rather drastic reduction of 28 per cent. in flaxseed acreage from 618,961 to 445,700 acres."

Under the auspices of the Canadian Seed Growers' Association, Field Days are being held this month at various points throughout Saskatchewan. Mr. H. S. Vigor, secretary of the Saskatchewan Branch of the Association (shown above), will be one of the principal speakers.

Menace To Health

Dental Authority Says Sugar and White Flour Injurious To Teeth

Toronto, Ont.—The corner candy store is a greater menace to public health than the old corner saloon, according to Dr. Martin Dewey, New York, president of the American Dental Association.

Asked for an interview during the dental convention he is attending here, Dr. Dewey said, "just say this—it has been said a million times, but it is true. There is a plenty of reputation for white flour and white sugar are the big enemies to the teeth of civilized people. Those are the culprits which are responsible for more ill-health as far as teeth are concerned than any two articles you could mention."

PREFERENTIAL TARIFF ASSISTS EMPIRE TRADE

Ottawa, Ont.—Preferences granted by Canada to Empire countries amounted to \$20,000,000 during the year ended March 31, 1931, according to the preliminary trade report just issued. This was estimated as a difference between the duty collected under the preferential tariff and what would have been collected under a general tariff. The difference between the preference and treaty tariffs would have been six million dollars less.

Total Empire imports for the year under the preferential tariff amounted to \$141,588,150. The duty collected amounted to \$19,125,220, at an average ad valorem rate of 13.5 per cent. The estimated duty for this volume under treaty tariff would have been \$14,949,802, and under a general tariff \$49,202,600. Of the total imports goods valued at \$37,151,600 entered Canada free.

The great bulk of these imports came from the United Kingdom, the total being \$30,365,805, of which \$18,288,422 represented free imports. Duty collected on United Kingdom imports amounted to \$15,677,771. Under a treaty tariff this would have been \$23,737,060, and under a general tariff \$28,862,962.

The next largest importer to Canada, the British West Indies, sent goods valued at \$13,565,762, of which \$3,474,795 was dutiable, bringing a revenue of \$1,366,478.

Under a treaty tariff this would have been \$17,072,051, and under a general tariff \$17,347,446.

Under a treaty tariff this would have been \$17,072,051, and under a general tariff \$17,347,446.

PROPOSAL MADE TO ESTABLISH EMPIRE BANK

Ottawa, Ont.—Establishment of a super-central empire bank, represented by each participating country by a local office, was advocated by J. F. Darling, director of the Midland Bank of England, and well-known authority on silver.

The bank, Mr. Darling stated, would commence operations with a fund of approximately 100,000,000 pounds allocated to each participating country as agreed upon. This fund would be increased annually by three per cent. over the preceding year.

In a brief memorandum on imperial co-operative credit and silver, forwarded by a newspaper interview, Mr. Darling went into his proposed plan. It was taken for granted, he said, that to improve the present situation it was necessary to create a potential but unused credit which, through co-operation, might be utilized to great mutual advantage. To operational credit would be added, the super-bank should be set up.

To operational credit would be added, the super-bank should be set up.

An Island Prison

Sons Of Freedom Are Being Established In New Quarters

Vancouver, B.C.—A little green island in the Gulf of Georgia became prison Thursday, August 11, to 20 sons of Freedom who for the first time saw the place where they must spend the rest of their lives. They were sent over from Vancouver and will be followed by similar groups under the same name. The prisoners are settled in their place of confinement. In the meantime, some 300 of their children will be cared for in provincial institutions.

Instead of spending the winter on their well kept farms amid seasonal changes in the weather, the prisoners, the Doukhobors will winter amid the soft rains of the mild coast climate. They will be housed in newly-built quarters, and will be paid wire ten feet high and may pursue their occupation of farming to some extent, the men on one side of the island, the women on the other.

Jobless Veterans Offer Services To Bolivia

London, Eng.—Many unemployed war veterans called at the Bolivian legation and consular offices here in response to an announcement of the British Fascists that a large number of British Fascists were anxious to join the Bolivian army in its dispute with Paraguay. They were courteously informed, however, that recruits were not accepted at present.

The consulate-general said it had received hundreds of letters from men desiring to offer their services, in addition to a "British Fascist" offer of 10,000 men if necessary.

Optimistic At Eighty

Man From Ontario Quite Confident Of Finding Work

Winnipeg, Man.—Flat broke and 80 years of age, an optimistic traveller arrived in Winnipeg from Bracebridge, Ont. He visited the city hall and said he had ridden bunkers here in search of work in the harvest fields. He was not exactly looking for a meal ticket at the city hall, he said. He just wanted to look in and talk to some of the folks.

A blacksmith by trade, he said he had never missed a meal in his life and did not expect to. He was sure he'd find something to do in the west after the harvest.

Prospectors Going North

Rush Started With Report Of Manitoba Gold Strike

Norway House, Man.—Reports of a promising gold strike on the northwestern extremity of Elk Island are setting in to this northern Manitoba outpost. A number of prospectors are joining in the rush from Island Lake and other mining men are making their way to the scene of the find by aeroplane.

The gold occurs in a telluride in a shalve zone about 100 feet thick and parallels the direction of the island. Elk Island is approximately 150 miles northeast of here.

Radio Cars For Police

Vancouver, B.C.—The past two months the Vancouver city police department has experimented with radio equipped automobiles and a short wave sending station located at police headquarters. Some 20 cars have already been put in service and police officials state the experiment has proven satisfactory.

WE SELL AND RECOMMEND
Wampole's Extract of Cod Liver
The Best Tonic for Coughs, Colds, Influenza and Grippe

IT IS better than ordinary cough medicines, for it reaches the seat of the trouble, relieves the cough and supplies continual treatment to build up the system to withstand future attacks. A splendid blood and body-building tonic for both young and old who take it regularly.
Price - \$1.00

A son was born to Col. and Mrs. Charles A. Lindberg at the Morrow home in Englewood, N. J. on Tuesday, Aug. 16. The date of birth was approximately five months and sixteen days from the day that little Charles Augustus was kidnapped. It is thought that the baby will be named after his grandfather, Dwight Morrow. Betty Gow, who is now visiting her parents in Scotland, will return to act as nurse of the new Lindberg baby.

Alberta Pool Elevators

Announcement

Alberta Pool Elevators will be operated during the current crop year in the same manner as in the crop year just passed; that is to say these elevators are free to receive delivery of grain from any person.

Alberta Wheat Pool members are given the option of disposing of their grain under any of the methods provided by the Canada Grain Act and obtaining the full current market price for same; or disposing of their wheat on pool basis, accepting the prevailing initial payment, and participating in any future payments that may accrue from the pooling thereof.

Definite assurance is given that no deductions for Elevator Reserve or Commercial Reserve, or for repayment of the 1929 overpayment, will be taken from the proceeds of any grain delivered for pooling or for immediate sale during 1932-33 crop year.

It should be clearly understood by Pool members that the statements recently sent out covering the member's position on the 1929 overpayment are merely for the information of the individual member. These statements are not a demand for repayment of the 1929 overpayment in any respect.
